WARDROBES**

# EXCEPTIONAL DESIGN, CREATIVE STORAGE

## Why are Swan Systems Sliding Wardrobe Unique?

The designer of the product, Vic Colley, was awarded a British Patent (No. 2304361) some 30 years ago.

The Patent was for the technical originality of the door frame; no one had ever foil wrapped a profile and stiffened it with aluminium extrusion before. Vic was an experienced engineer and created this himself. His wife Pat was an interior designer and she chose the original colours. This product launched and grew their business and it is now sold nationwide to independent bedroom retailers.

### Why does this matter?

To you the customer, you can have a choice of 17 different frame colours of the Swan Sliding Wardrobe doors. The colours of these frames match a variety of fitted and freestanding furniture allowing you to blend – or contrast – the Swan Sliding Wardrobes in your home.

### Colours

There are currently 17 different colours in the Swan Sliding Wardrobe range – as of October 2019. Please see in store for the latest colour swatch. Some new colours may be introduced and some may be dropped.

## The Swan Sliding Wardrobe is a wonderful product to have in your home.

You cannot buy this product in any other store apart from Swan Systems Furniture or any of its trade partners in the UK.

Look out for the Swan Systems seal of approval...

*Take a look at some of the different installations from our customers for inspiration for your home...*

## Inside a Swan Systems Sliding wardrobe

**At Swan Systems Furniture, we install a matching sub-frame and floor plinth to create a picture frame for the doors to sit inside.**

The cill is then placed on top of the floor plinth, before installing the top track and then a matching cover trim. We then build the interiors you have requested.

Some of the Swan Trade partners may install using an alternative method. Please discuss thier process with them.

**Here are some examples of interior layouts.**
